2/9/71

Dear Paul,

Hasty, pre-daylight note on two things: I've found the misplaced Lowery memo and will write it as soon as I can and enclosed are the originals of Abgel's 2/5 letter with the CIA enclosure. I've merely skimmed it, think it may be interesting, and will ask for what is referred to if you do not already have it. Please return after copying. I'm not even taking time for such simple things, I'm that loaded with deadline court work on 2569-70, on which I finally got the attachments to the 1/13 motion (certified as attached) and they require exhaustive analysis and comment on which I did about 4,000 words yesterday afternoon and night.

I do not remember asking for this earlier, and they didn't have to send it, they could just have made a general response. So, I wonder if the suit has them as worried as it should. Somebody there ought to begin to understand that they got their top job into a perjury case I think no federal judge will heed. But of the perjury, within the meaning of the law (knowing false swearing about the material -and this is the most material possible). The papers are too long for me to try and copy and I have no legal-sized paper except what is so far out of date it won't make a clipping that is legible.

Any comment or suggestions?

I have written a response and new motions that will be included in the final part of Pt, whether or not they succeed in court. The immediate problem is editing and getting it typed, with Lil working long hours until 4/15 and my deadline 2/16. Now all this new!

Right now those things you gave back would be sox important, and particularly in a court record where the dishonesty of those scholars is so total!

Please return as soon as you can. As soon as I get these papers files I'll want to reply and ask some questions.

Nothing else new. I've not spoken to Bob so I have no further news on the delivery. I know the copying will await the complete delivery. I'll be there in a week and will know then, if not sooner. Bud was due back in town yesterday, so I may get a call. Jim was supposed to come up Sat but insomnia made it inadvisable.

Hastily
